Professional Summary

Computer Science graduate pursuing an MCA, building full-stack and AI-integrated portfolio applications with React, Next.js and TypeScript. Hands-on work includes local RAG, PostgreSQL vector search, REST APIs, data analytics and automated testing. Brings troubleshooting and communication experience from technical support and IT recruitment.

Technical Skills

Frontend: JavaScript, TypeScript, React.js, Next.js, HTML5, CSS3, Tailwind CSS, Vite

Backend and Data: Node.js, REST APIs, SQL, PostgreSQL, pgvector, Supabase Auth/Storage, MySQL

Applied AI: RAG, embeddings, semantic search, prompt engineering, Ollama, Transformers.js

Testing and Tools: Vitest, Playwright, Git, GitHub, VS Code, Netlify, Leaflet

Additional: Java, Python basics, pandas CSV analytics

AI Development Tools: OpenAI Codex, Claude Code, Cursor, ChatGPT for coding, debugging and review

Projects

Groundwork - RAG Knowledge Assistant

Next.js, TypeScript, Supabase, pgvector, Ollama

- Built a local RAG pipeline from private PDF upload and page-aware chunking to 384-dimensional MiniLM embeddings, PostgreSQL storage and cosine similarity retrieval.
- Integrated local Ollama answers with filename/page citations, insufficient-evidence handling, saved conversations and document-scoped chat; enforced ownership with session checks and row-level security.
- Added automated regression tests and a responsive workspace with Documents, General AI and Auto modes. Runs locally with a Supabase backend.

FinanceFlow - Personal Finance Dashboard

React, TypeScript, Vite, Recharts, Python/pandas

- Built a local finance dashboard with transaction CRUD, budgets, savings goals, cash-flow charts and validated CSV import with duplicate detection.
- Added pandas analytics, Vitest tests, Playwright browser checks and TypeScript REST functions; cloud integrations remain pending live verification.

Projects Continued

Aizen Map

Next.js, TypeScript, Leaflet | aizenmap.netlify.app

- Built and deployed a responsive Bengaluru discovery app with linked map/list views, search, filters, browser geolocation, saved favourites and light/dark themes.
- Added source-linked curated listings, time-aware event visibility, keyboard controls and map-tile failure states.

PromptLab - AI Prompt Playground

Next.js, React, TypeScript, Supabase

- Built reusable prompts, model controls and browser-persisted conversations; implemented account flows and an authenticated OpenAI route, with live AI paused.

Calorie Tracker

React, Vite, JavaScript, localStorage

- Built daily meal logs, entry editing, calorie goals, date navigation, input validation and browser persistence.

Professional Experience

BlueRose Technologies - Information Technology Recruiter

Jul 2026 - Sep 2026 | Bengaluru

- Sourced and screened technical candidates, coordinated interviews and supported onboarding in Bengaluru.

FirstMeridian Global Services - Associate Staffing Specialist

Sep 2025 - Jul 2026 | Bengaluru

- Managed IT recruitment workflows, including IBM client requirements, using Zoho and SAP Fieldglass in Bengaluru.

Altruist Technologies Pvt. Ltd. - CRM / Technical Support

Mar 2024 - Jan 2025 | Bengaluru

- Resolved Airtel Black support tickets covering troubleshooting, service requests, escalations and billing/refund cases in Bengaluru.

Education

Master of Computer Applications

Amity University Online | 2026 - 2028 (Pursuing)

B.Tech in Computer Science and Engineering

Pydah College of Engineering & Technology | 2017 - 2021

Certification

Claude Academy: Claude 101 | Anthropic | 2026
